Art Unit: 2625

1. Claims 1-11 are pending. Claim 1 is independent.

2. This application is in condition for allowance except for the following formal matters:

In claim 1, line 2 of page 11, "the light surge" lacks antecedent basis and should be changed to – a light surge --;

line 7 of the page, "at two ends" should be changed to – at two ends thereof --;

line 8 of the page, "at two ends" should be changed to – at the two ends --;
and

line 12 of the page, "the bent parts ... is" should be changed to – the bent parts ... are --.

In claim 3, line 16 of page 11, "the inner sides" should be changed to – inner sides --; and

still line 16 of the page, "is" should read – are --.

In claim 4, line 18 of page 11, "the light angle" should read – a light angle --;

line 19 of the page, "the terminal" should read – a terminal --; and

lines 19-20 of the page, "the lens half angle" should read – a lens half angle --.

Claims 1, 3 and 4 are objected to in this Office action. Claims 2 and 5-11 are objected to as being dependent on an objected base claim. **Thus, claims 1-11 are objected to in this Office action.**

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

3. The following is an examiner's statement of reasons for allowance:

Claim 1 would be allowable over the prior art of record because the prior art references, cited below, while disclosing a bent lamp having two bent parts at two ends thereof for generating the light beam, do not disclose a set of obscuring units fixed at the two bent parts at the ends of the bent lamp to partially obscure the light of the lamp, respectively, so as to repress a light surge cause at the image sensor as claimed. Thus, this feature in combination with other limitations of claim 1 is not taught by the prior art of record.

Claims 2-11 depend on claim 1.

Kawai et al. (U.S. Patent NO. 5,499,112), also cited below, discloses a set of obscuring units (306s or 307s in Figs. 14 and 15) disposed at two ends of a light guide (3) each having a light source disposed thereat to repress a light surge caused at the

Art Unit: 2625

sensor. However, the light guide or light source of Kawai et al. does not have two bent parts at two ends thereof as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
